

## **MEDIA RELEASE**

FOR IMMEDIATE RELEASE

**SUBJECT:** Arena Update

**DATE:** 30-01-2012

The first two air sample readings have been received and are far lower (0.0033 and 0.0011 fibres per cubic centimeter) than limits that are considered below the acceptable limit (0.01 fibres per cubic centimeter or above).

Final sample analysis should be in place on Monday (January 30, 2012). The Town continued inspections and review over the weekend. Once we have received the rest of the results we will be able to establish a timeline for further action which will include required professional removal, full clean up and final testing.

Despite there being an extremely low risk of harm, the arena was closed for public safety reasons.

We shall continue to keep all informed, and thank you for your patience, as we work to restore a safe arena.

-30-

For further information, please contact Mayor Lorne Mann on (780) 624 1380 or (780) 618 6867 or (780) 624 4860.
