

DOUBLES RULES

Tips for Players

HEY! WHAT HAPPENS WHEN YOU HIT YOUR OPPONENT WITH THE BALL?

The striker, player 'X', is entitled to hit the ball to any part of the front wall and the sidewalls near the front wall. Imagine a triangle formed between the ball and the front corners of the court, and the sidewalls near the front wall (dotted lines). Player 'A' does not clear the triangle and player 'X' hits 'A' with the ball. The ball is going directly to the front wall and was not played off the back wall.

Player 'X' is awarded the point.

NOTE: Player 'X' should not hit the ball but ask for a let since s/he will be awarded a point because player 'A' is in the triangle, a winning situation for player 'X'.
